Analysis Certificate

Animal data

Name: ULTIMATE STAR VAN DE SCHELPHOEVE
Date of birth: 27.04.2020
Sex: Male
Chip number: 981100004715337
Breed: Unknown

Sample data

VHL_ID: P515094
Test ID-nr: 444401 1
Material: Blood

P318 - Warmblood Fragile Foal Syndrome (WFFS) - Date of test: 11.05.2023

Testresult: NO CARRIER

D. Mioch, MSc Veterinary Medicine
CEO

P318 - Warmblood Fragile Foal Syndrome (WFFS)

Explanation about the result:

NO CARRIER: The animal has two normal alleles and is therefore not affected by this specific variant. The animal will not develop the described clinical features due to this variant. When used in breeding, a healthy allele will be passed to all offspring.

CARRIER: The animal is a carrier; it has one normal and one affected allele. The animal will not develop the described clinical features due to this variant. In breeding, there is a 50% chance for each offspring that it will receive an affected allele.

AFFECTED: The animal is affected; it has two affected alleles. The animal will most likely develop the described clinical features due to this variant. When used in breeding, all offspring will receive an affected allele.

VHL exercises the utmost care in performing each of its engagements. No party other than the principal may derive any rights from the results of these engagements, and the principal expressly indemnifies VHL in respect of any third-party claims. VHL policy provides that any complaints must be received within eight days of the completion of an engagement and imposes restrictions on liability. In that respect, VHL refers to its General Conditions, which are applicable to all engagements VHL performs and which were accepted at the time of purchase. These General Conditions can also be reviewed at www.vhlgenetics.com. The work VHL performs is based on the material and/or data it receives from its principal. This report may only be copied in its entirety. The organization is ISO:9001 certified for all her work. This test is based on PCR technology.
